944209 Sacramento, CA 94244-2090

Dear Fish and Game Commissioners: As a Californian, I care deeply about the health of our state's coastal habitats and marine wildlife. I am writing today to respectfully ask that you maintain the current timeline for implementing the South Coast marine protected areas and deny an extension of the CEQA comment period. The Marine Life Protection Act (MLPA) is one of our State's most critical ocean protection laws. Marine protected areas (MPAs) are essential tools for protecting our treasured marine wildlife and ecosystems and will ensure a healthy ocean for future generations. But while the MLPA is globally significant in its call for a statewide network of MPAs, the inclusive stakeholder process set up to accomplish those goals is also unparalleled. The statewide effort to implement the MLPA has included thousands of hours of deliberation and public comment by fishermen, conservationists, divers, and scientists. In the South Coast alone, there have been 57 public meetings with over 95 hours of public testimony. An unprecedented level of planning and review over every issue related to MPAs has already been conducted for the South Coast MPA network, including an exhaustive environmental document. With the Channel Islands, Central and North Central study regions already protected in a network of MPAs, the Fish and Game Commission now has the opportunity to get one step closer to completing the nation's first statewide MPA network. This network will enhance ocean protection, while still allowing fishing to continue on nearly 90% of the coast. In short, it is a win for all Californians. Please act swiftly to implement this historic conservation effort for the benefit of all Californians, both present and future.

Sincerely,

Whitney Graves

Dear Fish and Game Commissioners: This has been an arduous process - PLEASE NO DELAY's.... We must have marine protected areas. I've fished all my life recreationally here in So. Cal, I've watched as size, species and numbers have diminished. We all go down near the existing LaJolla reserve because on the fringes it is more productive to fish. I care about the health of our state's coastal habitats and marine wildlife. I am writing today to respectfully ask that you maintain the current timeline and deny an extension of the CEQA comment period. The Marine Life Protection Act (MLPA) is one of our State's most critical ocean protection laws. California Fish and Game Commission 1416 Ninth Street P.O. Box
944209 Sacramento, CA 94244-2090

Dear Fish and Game Commissioners: As a Californian, I care deeply about the health of our state's coastal habitats and marine wildlife. I am writing today to respectfully ask that you maintain the current timeline for implementing the South Coast marine protected areas and deny an extension of the CEQA comment period. The Marine Life Protection Act (MLPA) is one of our State's most critical ocean protection laws. Marine protected areas (MPAs) are essential tools for protecting our treasured marine wildlife and ecosystems and will ensure a healthy ocean for future generations. But while the MLPA is globally significant in its call for a statewide network of MPAs, the inclusive stakeholder process set up to accomplish those goals is also unparalleled. The statewide effort to implement the MLPA has included thousands of hours of deliberation and public comment by fishermen, conservationists, divers, and scientists. In the South Coast alone, there have been 57 public meetings with over 95 hours of public testimony. An unprecedented level of planning and review over every issue related to MPAs has already been conducted for the South Coast MPA network, including an exhaustive environmental document. With the Channel Islands, Central and North Central study regions already protected in a network of MPAs, the Fish and Game Commission now has the opportunity to get one step closer to completing the nation's first statewide MPA network. This network will enhance ocean protection, while still allowing fishing to continue on nearly 90% of the coast. In short, it is a win for all Californians. Please act swiftly to implement this historic conservation effort for the benefit of all Californians, both present and future.

Sincerely,

Sarah Smith

An unprecedented level of planning and review over every issue related to MPAs has already been conducted for the South Coast MPA network, including an exhaustive environmental document. With the Channel Islands, Central and North Central study regions already protected in a network of MPAs, the Fish and Game Commission now has the opportunity to get one step closer to completing the nation's first statewide MPA network. This network will enhance ocean protection, while still allowing fishing to continue on nearly 90% of the coast. In short, it is a win for all Californians. Please act swiftly to implement this historic conservation effort for the benefit of all Californians, both present and future.

Sincerely,

Colin O'Neill

Dear Fish and Game Commissioners: As a Californian, I care deeply about the health of our state's coastal habitats and marine wildlife. I am writing today to respectfully ask that you maintain the current timeline for implementing the South Coast marine protected areas and deny an extension of the CEQA comment period. The Marine Life Protection Act (MLPA) is one of our State's most critical ocean protection laws. Marine protected areas (MPAs) are essential tools for protecting our treasured marine wildlife and ecosystems and will ensure a healthy ocean for future generations. But while the MLPA is globally significant in its call for a statewide network of MPAs, the inclusive stakeholder process set up to accomplish those goals is also unparalleled. The statewide effort to implement the MLPA has included thousands of hours of deliberation and public comment by fishermen, conservationists, divers, and scientists. In the South Coast alone, there have been 57 public meetings with over 95 hours of public testimony. An unprecedented level of planning and review over every issue related to MPAs has already been conducted for the South Coast MPA network, including an exhaustive environmental document. With the Channel Islands, Central and North Central study regions already protected in a network of MPAs, the Fish and Game Commission now has the opportunity to get one step closer to completing the nation's first statewide MPA network. This network will enhance ocean protection, while still allowing fishing to continue on nearly 90% of the coast. In short, it is a win for all Californians. Please act swiftly to implement this historic conservation effort for the benefit of all Californians, both present and future.

Dear Fish and Game Commissioners: As a Californian, I care deeply about the health of our state's coastal habitats and marine wildlife. I am writing today to respectfully ask that you maintain the current timeline for implementing the South Coast marine protected areas and deny an extension of the CEQA comment period. The Marine Life Protection Act (MLPA) is one of our State's most critical ocean protection laws. Marine protected areas (MPAs) are essential tools for protecting our treasured marine wildlife and ecosystems and will ensure a healthy ocean for future generations. But while the MLPA is globally significant in its call for a statewide network of MPAs, the inclusive stakeholder process set up to accomplish those goals is also unparalleled. The statewide effort to implement the MLPA has included thousands of hours of deliberation and public comment by fishermen, conservationists, divers, and scientists. In the South Coast alone, there have been 57 public meetings with over 95 hours of public testimony. An unprecedented level of planning and review over every issue related to MPAs has already been conducted for the South Coast MPA network, including an exhaustive environmental document. With the Channel Islands, Central and North Central study regions already protected in a network of MPAs, the Fish and Game Commission now has the opportunity to get one step closer to completing the nation's first statewide MPA network. This network will enhance ocean protection, while still allowing fishing to continue on nearly 90% of the coast. In short, it is a win for all Californians. Please act swiftly to implement this historic conservation effort for the benefit of all Californians, both present and future.

Sincerely,

Cory Wylie

California Fish and Game Commission 1416 Ninth Street P.O. Box
944209 Sacramento, CA 94244-2090

Dear Fish and Game Commissioners: As a Californian, I care deeply about the health of our state's coastal habitats and marine wildlife. I am writing today to respectfully ask that you maintain the current timeline for implementing the South Coast marine protected areas and deny an extension of the CEQA comment period. The Marine Life Protection Act (MLPA) is one of our State's most critical ocean protection laws. Marine protected areas (MPAs) are essential tools for protecting our treasured marine wildlife and ecosystems and will ensure a healthy ocean for future generations. But while the MLPA is globally significant in its call for a statewide network of MPAs, the inclusive stakeholder process set up to accomplish those goals is also unparalleled. The statewide effort to implement the MLPA has included thousands of hours of deliberation and public comment by fishermen, conservationists, divers, and scientists. In the South Coast alone, there have been 57 public meetings with over 95 hours of public testimony. An unprecedented level of planning and review over every issue related to MPAs has already been conducted for the South Coast MPA network, including an exhaustive environmental document. With the Channel Islands, Central and North Central study regions already protected in a network of MPAs, the Fish and Game Commission now has the opportunity to get one step closer to completing the nation's first statewide MPA network. This network will enhance ocean protection, while still allowing fishing to continue on nearly 90% of the coast. In short, it is a win for all Californians. Please act swiftly to implement this historic conservation effort for the benefit of all Californians, both present and future.

Sincerely,

Jonathan Alexander

California Fish and Game Commission 1416 Ninth Street P.O. Box
944209 Sacramento, CA 94244-2090

Dear Honorable California State Fish and Game Commissioners: As a Californian who fishes and enjoys the natural environment, I care more than most about our state's coastal habitats and marine wildlife. Please maintain the current timeline for implementing the South Coast marine protected areas and deny an extension of the CEQA comment period. As you know, extending the deadline jeopardizes the Marine Life Protection Act (MLPA) outcome by allowing time for political appointments by and of people who have not been involved in the extensive MLPA public process as I and so many people have. I review EIRs professionally, and 45 days is more than adequate to review and comment on even technical EIRs, and already meets or exceeds the minimum required Draft EIR review period. The MLPA is one of our State's most important ocean protection laws. Marine protected areas (MPAs) are key tools for protecting treasured marine wildlife, ecosystems and fisheries and will ensure a healthy ocean for future generations. But while the MLPA is globally significant in its call for a statewide network of MPAs, the inclusive stakeholder process set up to accomplish those goals is also unparalleled. The statewide effort to implement the MLPA has included thousands of hours of deliberation and public comment by fishermen, conservationists, divers, and scientists. In the South Coast alone, there have been 57 public meetings with over 95 hours of public testimony. An unprecedented level of planning and review over every issue related to MPAs has already been conducted for the South Coast MPA network, including an exhaustive environmental document. With the Channel Islands, Central and North Central study regions already protected in a network of MPAs, the Fish and Game Commission now has the opportunity to get one step closer to completing the nation's first statewide MPA network. This network will enhance ocean protection, while still allowing fishing to continue on nearly 90% of the coast. In short, it is a win for all Californians. Please move the CEQA process forward now and act swiftly to implement this historic conservation effort for the benefit of all Californians, both present and future.

Sincerely,

Brian Trautwein

Dear Fish and Game Commissioners: As a Californian, I care deeply about the health of our state's coastal habitats and marine wildlife. I am writing today to respectfully ask that you maintain the current timeline for implementing the South Coast marine protected areas and deny an extension of the CEQA comment period. The Marine Life Protection Act (MLPA) is one of our State's most critical ocean protection laws. Marine protected areas (MPAs) are essential tools for protecting our treasured marine wildlife and ecosystems and will ensure a healthy ocean for future generations. But while the MLPA is globally significant in its call for a statewide network of MPAs, the inclusive stakeholder process set up to accomplish those goals is also unparalleled. California Fish and Game Commission 1416 Ninth Street P.O. Box
944209 Sacramento, CA 94244-2090

Dear Fish and Game Commissioners: As a Californian, I care deeply about the health of our state's coastal habitats and marine wildlife. I am writing today to respectfully ask that you maintain the current timeline for implementing the South Coast marine protected areas and deny an extension of the CEQA comment period. The Marine Life Protection Act (MLPA) is one of our State's most critical ocean protection laws. Marine protected areas (MPAs) are essential tools for protecting our treasured marine wildlife and ecosystems and will ensure a healthy ocean for future generations. But while the MLPA is globally significant in its call for a statewide network of MPAs, the inclusive stakeholder process set up to accomplish those goals is also unparalleled. The statewide effort to implement the MLPA has included thousands of hours of deliberation and public comment by fishermen, conservationists, divers, and scientists. In the South Coast alone, there have been 57 public meetings with over 95 hours of public testimony. An unprecedented level of planning and review over every issue related to MPAs has already been conducted for the South Coast MPA network, including an exhaustive environmental document. With the Channel Islands, Central and North Central study regions already protected in a network of MPAs, the Fish and Game Commission now has the opportunity to get one step closer to completing the nation's first statewide MPA network. This network will enhance ocean protection, while still allowing fishing to continue on nearly 90% of the coast. In short, it is a win for all Californians. Please act swiftly to implement this historic conservation effort for the benefit of all Californians, both present and future.

Sincerely,

Joanne Schwartz

The statewide effort to implement the MLPA has included thousands of hours of deliberation and public comment by fishermen, conservationists, divers, and scientists. In the South Coast alone, there have been 57 public meetings with over 95 hours of public testimony. An unprecedented level of planning and review over every issue related to MPAs has already been conducted for the South Coast MPA network, including an exhaustive environmental document. With the Channel Islands, Central and North Central study regions already protected in a network of MPAs, the Fish and Game Commission now has the opportunity to get one step closer to completing the nation's first statewide MPA network. This network will enhance ocean protection, while still allowing fishing to continue on nearly 90% of the coast. In short, it is a win for all Californians. Please act swiftly to implement this historic conservation effort for the benefit of all Californians, both present and future.

Sincerely,

Amy Musante Goerke

California Fish and Game Commission 1416 Ninth Street P.O. Box
944209 Sacramento, CA 94244-2090

Dear Fish and Game Commissioners: As a Californian, I care deeply about the health of our state's coastal habitats and marine wildlife. I am writing today to respectfully ask that you maintain the current timeline for implementing the South Coast marine protected areas and deny an extension of the CEQA comment period. The Marine Life Protection Act (MLPA) is one of our State's most critical ocean protection laws. Marine protected areas (MPAs) are essential tools for protecting our treasured marine wildlife and ecosystems and will ensure a healthy ocean for future generations. But while the MLPA is globally significant in its call for a statewide network of MPAs, the inclusive stakeholder process set up to accomplish those goals is also unparalleled. The statewide effort to implement the MLPA has included thousands of hours of deliberation and public comment by fishermen, conservationists, divers, and scientists. In the South Coast alone, there have been 57 public meetings with over 95 hours of public testimony. An unprecedented level of planning and review over every issue related to MPAs has already been conducted for the South Coast MPA network, including an exhaustive environmental document. With the Channel Islands, Central and North Central study regions already protected in a network of MPAs, the Fish and Game Commission now has the opportunity to get one step closer to completing the nation's first statewide MPA network. This network will enhance ocean protection, while still allowing fishing to continue on nearly 90% of the coast. In short, it is a win for all Californians. Please act swiftly to implement this historic conservation effort for the benefit of all Californians, both present and future.

California Fish and Game Commission
1416 Ninth Street P.O. Box 944209
Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

FLC-1

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

FLC-2

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

FLC-3

Sincerely,

John Riordan
949-365-5116

Attachment: Mime344.822

SOUTH COAST MARINE PROTECTED AREAS PROJECT FINAL ENVIRONMENTAL IMPACT REPORT

Responses to Form Letter C

Response to Comment FLC-1: Comment noted. See text provided in the preamble of this section on the 15-day extension that was granted by the Commission. *No changes to the Draft EIR are required.*

Response to Comment FLC-2: The commenter does not provide evidence to support the assertion that the proposed regulations will affect the commenter's ability to enjoy California's ocean resources. Furthermore, the proposed regulations will have no impact on any existing non-consumptive activities, and the five proposals presented in the EIR would affect less than 20 percent of state waters within the SCSR leaving the commenter with greater than 80 percent of state waters within the SCSR to continue existing consumptive activities allowable under current regulations. *No changes to the Draft EIR are required.*

Response to Comment FLC-3: Comment noted. *No changes to the Draft EIR are required.*

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler who has fished since the San Francisco Bay and the Pacific since the 1950's, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

William Nelson

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

I am very concerned about the MLPA process. If I had my way as a avid angler I would repeal the law. What I would do is start over and make the State of California prove there is a problem in the areas they propose a "protected" area.

The "best available science" is just not good enough. I'm not happy about the regulations that exist now. You want more restrictions on top of the regulations that were put into place since 1999?

Yes, I'm angry and don't feel I can support the MLPA initiative. All of you career environmentalists should put the taxpayers and sportsmen of California first.

The loss of our freedoms just never stop.

The very least you can do is extend a comment period on a corrupt process.

Sincerely,

Doug Corrigan

1416 Ninth Street P.O. Box 944209
Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

As a fishing rod manufacturer, this affects our business in California. The increasing pressure for closures affects sports fishing tremendously as we have seen in the past several years.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

John Posey

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid Freediving Spearfisherman , the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary. I think 90 days is a small price to pay for the Eternity of these proposed closures. There are many options still on the table that must be looked at in a logical and thorough manner, as opposed to the Rushed Agenda Format . Please extend the format and give ample time and consideration to these Huge and Final decisions prior to making what could be a regrettable decision for all.

Thank You

CODY ANNETT

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

Lance Knaak

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler and diver, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Even 90 days is too short a period given the complexity of this process and potential disastrous and expensive consequences of this process if it is done wrong.

Sincerely,

David Ploessel

California Fish and Game Commission
1416 Ninth Street P.O. Box 944209
Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

Ignacio Garibay
4077584801

California Fish and Game Commission
1416 Ninth Street P.O. Box 944209
Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

James Flynn

Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

The DEIR is a 548-page document that addresses a number of complex environmental issues that require careful consideration. The recreational fishing and boating community believes that it is imperative that the FGC extend this to a 90-day period to provide the public with sufficient time to review and comment on this report.

Decisions made under the MLPA process, including the DEIR, will have significant and long-lasting consequences for angling and boating in the region. The public deserves enough time to carefully review and provide input on the DEIR to ensure it is as comprehensive, informative and accurate as possible and is not driven by a need to meet arbitrary deadlines.

Sincerely,

Clint Freeman

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

clifford harlow

September 22, 2010

California Fish and Game Commission
1416 Ninth Street P.O. Box 944209
Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, both above and below the surface, the Marine Life Protection Act will have significant effects on my ability to enjoy California's ocean resources and will have an adverse effect on my physical and mental health in turn. Being able to go out on the water and fish or dive safely, with safe and relatively easy access, is the main way that I am able to relax and get some fresh air and exercise after a long week at work. With this tough economy many times I even have to work on weekends, so my access is cut even further.

As such, I have very little free time to review the DEIR to begin with. Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary. As I am given the right to review it, it is only fair that the average person be given enough time to properly vet and review this monumental package of paperwork. To put out this monster of a document and give the affected class an insufficient amount of time to review it properly is an act of bad faith at best and a commission of gross misconduct at the worst.

The very fact that this agenda item, which applies to Southern California, is being addressed at a meeting in Northern California is already a show of bad faith in my opinion. How am I, the average person and a member of the affected class, supposed to be able to come and render my comment in a public comment meeting if it is being held so far away from me that I

cannot make it without having to take at least a day or two off of work?

Sincerely,

Michael Nguyen

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

Wilbur D Roper Jr

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

Crystal Tillander

Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process. The everyday working person that enjoys recreational fishing, such as myself and family, needs more than 45 days in order to read, digest, and develop an opinion of such a lengthy, complex document.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Those of you responsible for implementing the MLPA should do all you can to avoid the continuation of poor and ill informed decision making that has plagued the MLPA process thus far.

Sincerely,

Alan Breininger

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

David Schniepp

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

I have reviewed portions of the DEIR and have found numerous flaws and omissions that should be further investigated by qualified personnel before the EIR is allowed to guide the MLPA process. I am sure that others have found further omissions as well. Please allow additional time for the DEIR to be properly evaluated.

Sincerely,

Charles Grosse

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

This EIR should not be "fast-tracked" for political reasons. I am aware that the governor's term is ending after the first of the year but that fact should not be taken into consideration regarding this vitally important process that affects so many people.

As a voting and taxpaying resident of the State of California, I simply do not care about any deadlines contained within any MOU's that the state has signed with private foundations or the current (lame duck) governor's desire to create an "enduring legacy" for himself by ramming "Marine Protected Areas" down the throats of the California public.

I used to work for an environmental engineering firm and I know that private sector "Environmental Impact Reports" take months, if not years to work through the governmental review and approval process.

Do not the people of California deserve the same opportunity to thoughtfully and thoroughly review and comment on state generated Environmental Impact Reports?

Sincerely,

William Raus, Jr.

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

Christopher Ruff

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources,i feel that all of this MLPA stuff is not only unfair to me "a recreational fisherman" its unfair in the way it has all been handled from the beginning.I think changing size and bag limits is a much simpler solution than to flat out close off areas permanently.It would make more sense economically for the DFG who has to enforce all of these closures.Frankly if areas are closed where i fish i probably wont be fishing U.S waters anymore and wont be purchasing a California fishing license.CHANGE BAG AND SIZE LIMITS,they are at this time way out of whack considering how many people fish in this state nowadays.I have always practiced catch and release and only keep what my family can eat,i do not stock my freezer full of fish if i have a productive day,which is getting harder and harder these days.My concern with limits is due to the fact that we now have a lot more people fishing and the limits have not been changed in a long time.This has to be having an effect.I have been fishing almost 40 years and have seen the decline in the amount of fish there are to be caught.Just a quick example 35 anglers on a half day boat taking limits of calico bass for weeks on end is ridiculous,thats 350 bass per trip.that makes quite an impact.I have nothing against them running a business but that is not showing any kind of effort to conserve the areas they fish,i feel that way about any angler who chooses to practice take all you can because you can.Thank you for your time.

Sincerely

John

California Fish and Game Commission
1416 Ninth Street P.O. Box 944209
Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

Chris White

September 22, 2010

California Fish and Game Commission
1416 Ninth Street P.O. Box 944209
Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

After a cursory review of the long MLPA Initiative document with special attention to the Laguna Beach area, I can only come to one clear conclusion to this huge and costly study. The conclusion is that this huge effort is a prime example of why the cost of government has grown to the point that the government is driving the state and taxpayers into bankruptcy. This particular program (MLPA), despite the huge costs, is totally unmanageable, unrealistic and unnecessary. > Fish and Game has, and still can, provide all the species protection that is really necessary without any of this unmanageable and economically destructive MLPA bureaucracy. The totally unnecessary politically driven idea of closing off almost all of the Laguna Beach coast is nonsense. Unfortunately my city, Laguna Beach, is heavily populated by silly environmental extremists who control every aspect of Laguna Beach politics and who have no sense of economics nor any common sense.

The size and the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

Dave and Diane Connell

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary. How can you propose new restrictions when you cannot enforce the ones you have now? I also find it highly suspicious that the state had no money for the mlpa process BUT some PRIVATE groups (aka elitist, treehuggers, liberals.....) stepped in and funded this process. That is a BRIBE. Thats the same as big tobacco doing studies on the effects of smoking.

Sincerely,

Aaron Radding

California Fish and Game Commission
1416 Ninth Street P.O. Box 944209
Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Regards,

Scott Leachman

Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

Holli Littell

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

I am disappointed after only receiving a 7 day notice of the referenced special meeting of the Commission to consider and vote on a 90 day extension to approve the EIR for the South Coast Region. I'm even more disappointed, but not surprised, as is the custom with the Commission when they want to limit public testimony schedules the meeting in a non-convenient location, has scheduled this meeting in McClellan, CA and not within the venue affected.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

Allen Tucker

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

The Marine Life Protection Act (MLPA) will significantly affect my ability to enjoy my favorite ocean sports, boating and sport fishing. Sport fishing has minimal impact on ocean resources, and sport fishermen are among the people most concerned about the degradation of the ocean by: destructive commercial fishing practices, commercial overfishing, pollution and habitat destruction.

Therefore it is important that sport fishermen be given enough time to review and weigh in on the process. Given the complexity and magnitude of the DEIR, a 90-day review and comment period is necessary.

Sincerely,

Paul Rye

California Fish and Game Commission
1416 Ninth Street P.O. Box 944209
Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

David Schafer

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary. NOT ONLY WHAT THEY SAID ABOVE BUT THE KIDS !!!!!!! THE HUNTER GATHERS OF TOMMOROW WILL NOT BE ABLE TO DO WHAT IS WRITFULLY THERES. WHAT IS AMERICA COMING TO POLITICANS SAYING AND DOING WHAT THEY WANT TO DO WITH OR OCEANS . WELL THEN RESTRICT THE LIMITS . BECAUSE IF U CLOSE OR FISHERIES THEN YOU WILL HAVE A BIG IMPACT ON OR ECONOMY. WHY DONT YOU STOP THE COMMERCIAL FISHING FIRST!!!!!!! YOU WILL HURT SMALL BUSINESS IN AMERICA . YOU BETTER WERE CONSIDER WHAT U ARE DOING . THE KIDS NEED SOMETHING TO DO IF THEY ARE FORTUNIT ENOUGH TO DO WHAT THEY WERE BORN TO DO.IF THE KIDS CANT TAKE THERE AGGRESSIONS OUT AT SEA THEN THEY WILL BE MORE LIKLEY TO DO DRUGS!!!!!!!!!!!!!!!!!!!!!! IF U WANT THE DRUG USERS TO ESCALATE THEN THINK. POLLITANTS ,COMMERCAIL FISHING,BIG SHIPS HAVE A HUGE IMPACT ON OR OCEANS.SO DO THE MATH OR THERE WILL BE A LOT MORE POACHERS THAN THE GOVERNMENT CAN HANDLE .

Sincerely,

PHILLIP TWARDOWSKI
